

EXTREME SOAP DISPENSER WITH SOAP LEVEL INDICATOR

TOUCH-FREE ELECTRONIC SOAP DISPENSER

SPECIFICATIONS

Touch-free electronic soap dispenser for deck mounted installations with soap level indicator incorporated in the dispenser. Activated by infrared sensor. For use with any non-proprietary soap at the recommended viscosity. Chrome plated body, other finishes available. Includes a 6 liter soap tank suitable for high traffic areas. With a designated peristaltic pump that prevents clogging and back flow. Adjustable settings by remote control: soap quantity, soap tank refill, temporary off and reset to factory settings.

OPERATION

Touch-free electronic soap dispenser operated by infrared sensor. The soap dispenser automatically activates when users place their hands within sensor range, providing a measured amount of soap

(adjustable by remote control). If the users remove the hand before the full amount is dispensed, the soap dispenser immediately stops the soap flow. The soap level indicator shows green when soap tank is full, orange when soap level is low and red when a refill is needed.

APPLICATION

Touch-free electronic soap dispenser with dripless automatic shutoff, this soap dispenser helps washroom organization and cleanliness. The soap level indicator is the ideal solution to reduce maintenance costs in heavy usage areas with no need to open the cabinet to check soap level. Combined with the touch-free electronic faucet, it creates a germ-free automated environment. Ideal for stadiums, train and bus stations and highway rest stops.

PRODUCT AT A GLANCE

Installation	Deck-mounted
