

MULTIFEED GREEN SOAP DISPENSER

TOUCH-FREE ELECTRONIC SOAP DISPENSER FOR MULTIFEED SYSTEM

SPECIFICATIONS

Touch-free electronic soap dispenser for deck-mounted installation. Activated by infrared sensor. For use with any non-proprietary soap. Connects to a central Multifeed soap system (which can support up to six soap dispensers simultaneously). Chrome plated body, other finishes available. With a designated peristaltic pump that prevents clogging and back flow. Adjustable settings by remote control: soap quantity, soap tank refill, temporary off and reset to factory settings.

OPERATION

Touch-free electronic soap dispenser operated by infrared sensor. The soap dispenser automatically activates when users place their hands within sensor range, providing a measured amount of soap (adjustable by remote control). If the users remove the hand before the full amount is dispensed, the soap dispenser immediately stops the soap flow.

APPLICATION

With the dripless automatic shutoff, this soap dispenser helps washroom organization and cleanliness. Using the Multifeed system, it is easily and quickly refilled and maintained. Combined with the touch-free electronic faucet, it creates a germ-free automated environment. Ideal for stadiums, train stations, other transportation hubs and highway rest stops.
