

NARA 2022 PE

TOUCH-FREE ELECTRONIC W.C. FLUSH VALVE

SPECIFICATIONS

Touch-free electronic W.C. flush valve with a piezo override switch. Activated by a dual flush infrared sensor. Metallic panel in satin finish. Shut-off valve and filter are included. Powered by a 9V transformer with a backup system in case of power failure. 24-hour hygiene flush included. Adjustable settings by remote control: sensor range, security time, delay in, delay out, on-off and reset to factory settings. Low water consumption options and pre-flush operation are available upon request.

OPERATION

Touch-free electronic W.C. flush valve. Water will flush after the user moves away from the toilet. If the user spends less than one minute in front of the sensor, a half flush (3 liters) will take place. For more than one minute, a full flush (6 liters or 4.5 liters with the water saving option) will take place. Alternatively, a flush can be activated by an override touch piezo switch.

APPLICATION

Helps washrooms stay clean and saves water. Ideal for educational institutions, transportation hubs, gas stations and restaurants. In addition, its minimalistic style makes it perfect for any heavy traffic locations with high design standards.

PRODUCT AT A GLANCE

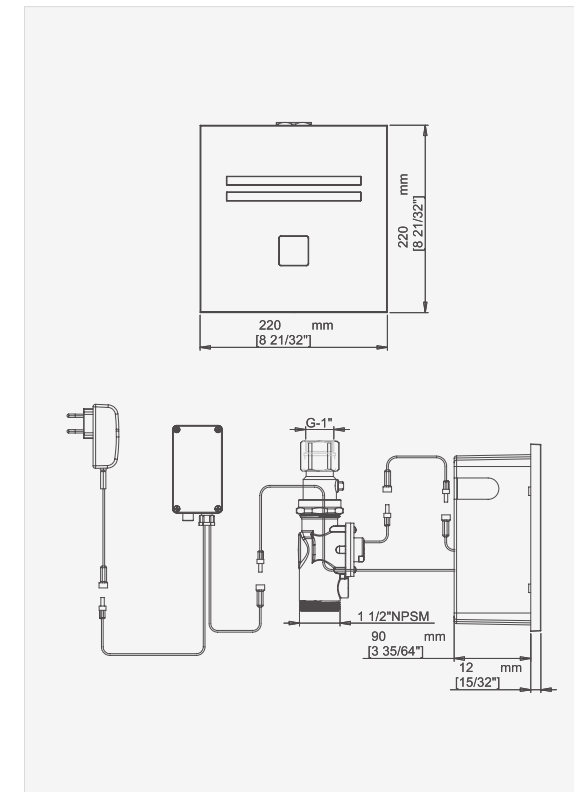

Installation	Concealed
Power Supply	9V Transformer with a backup system in case of power failure
Operating pressure	1.0-8.0 bar / 14.5-116.0 psi
Water flow	6 lpf Full flush / 1.58 GPF 3 lpf Half flush / 0.8 GPF
Water saving option	4.5 lpf full flush / 1.18 GPF
