

TOUCHLESS TRENDS

TO COMBAT THE SPREAD OF GERMS AND VIRUSES

TOUCHLESS OPERATION

Intuitive | Simple | Safe

WHAT'S NEW AT STERN?

Since 1989, Stern, one of the pioneers in touchless sanitary products for public restrooms has been producing touchless faucets, soap dispensers, flush valves, hand dryers and customizable cabinets with touchless product combinations.

But what about the contact applied to open the door of the WC cubicles?

Stern, a leading manufacturer of water-efficient, environmentally friendly sanitary products, presents the only access system that seamlessly works with both proximity sensors or manual operation as preferred!

Now you can ensure optimal surface hygiene and minimize the risk of cross-contamination, using Stern's touchless bathroom cubicles.

TOUCHLESS CUBICLE PARTITIONS FOR COMMERCIAL RESTROOMS

- Optimizing Surface Hygiene and Minimizing the Risk of Cross Contamination
- Quick & Easy Installation
- Intuitive and Simple to Use
- Safe and Reliable
- Minimal Maintenance and Failure-Free

Fully integrated access system that offers door control from the exterior and interior of the cubicle using hand proximity sensors. The sensor and LED indicator mechanism on the exterior of the system resembles a standard door lock. On the interior of the door, the sensor and LED indicator mechanism appear as a regular circular handle. The system runs using 24 volt electrical power using a transformer from the main power source for up to 4 cubicles together. Wiring is installed during manufacturing, no wiring is required during the installation.

SWAR LINE

Complete sanitary cabinet with a lockable mirror

Stern’s SWAR hand washing station elegantly combines cleanliness, practicality, and cost effectiveness in a contemporary sanitary cabinet with a lockable mirror, including LED pictograms for intuitive user guidance. Eliminates messy, slippery floors and reduces the amount of labor during installation and for commercial facilities maintenance.

SWAR TV

Complete sanitary cabinet with a lockable mirror and 23.5” TV. Includes high speed hand dryer, touch free faucet, mixing valve, touch free soap dispenser and LED pictograms for intuitive user guidance and decoration. Moreover, the award-winning mirror monitor can be incorporated into the cabinet, allowing for the display of user information, advertisements, or entertainment. With Stern’s behind-the-mirror hand washing stations, you can elevate your bathroom to the forefront of modernity. Delivered with remote controls to adjust soap dosage, select light color or sequence and customize the faucet settings.

SWAR

Includes touch free faucet and mixing valve, touch free soap dispenser and touch free high speed hand dryer. Delivered with remote controls to adjust soap dosage, select light color or sequence and customize the faucet settings.

SWAR CITY

Includes high speed hand dryer, touch free faucet with optional mixing valve and touch free soap dispenser. Delivered with remote controls to adjust soap dosage and customize the faucet settings.

STERN DUO

Water & soap come together, perfectly matched! Options abound with versatile touch-free pairs; deck or wall mounted, transformer or battery operated, a variety of special finishes and multiple possibilities for an aesthetic design.

TUBULAR TRIO

Perfect solution for airports and high traffic public restrooms. This innovative system seamlessly integrates touchless soap dispenser, faucet, and hand dryer into one sleek collection, revolutionizing your restroom experience. Say goodbye to germs and wet counters as you effortlessly wash and dry your hands without ever touching a surface.

LOTUS TOP FILL

Elevate your hand hygiene with our Touchless Soap Dispenser featuring a Top-Fill Mechanism and Soap Level Indicator. Enjoy the pinnacle of cleanliness and convenience with easy refills, no-touch operation and always know when it's time to replenish.

MULTI-FEED SOAP DISPENSER

Top filling, compatible with non-proprietary soap, and including an LED soap level indicator, our under the deck Multi-feed Soap Dispenser greatly cuts down on soap and reduces maintenance costs, making it a real bonus for any high traffic & commercial bathrooms.

CSABA 2-IN-1

For the ultimate 2-for-1 solution, look no further than this single unit deck mounted soap and water knight in shining armor.

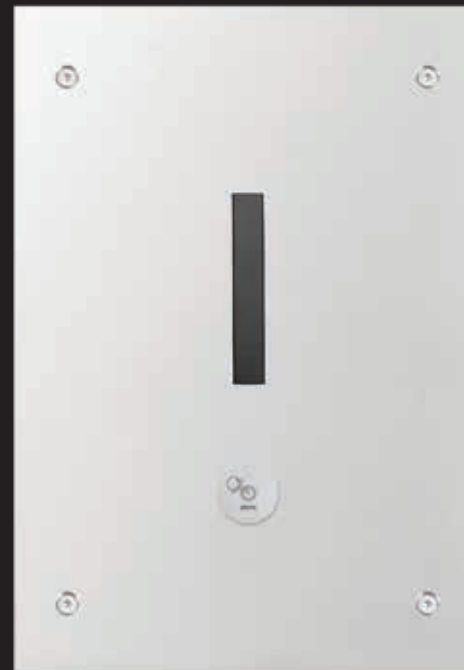

Csaba 2-in-1 is the ideal solution for retrofit projects with single hole basins or counter-tops with only one penetration. Comes with a peristaltic pump enabling its use with any kind of liquid soap.

NOBLE 3032

IMPROVED SANITATION AND WATER CONSERVATION IN COMMERCIAL RESTROOMS

Stern's Noble 3032 leads the way to maximum hygiene with touch-free operation. This original high efficiency concealed stainless steel AISI 316 toilet flush comes with 1.28 GPF making it ideal for water savings. Designed specifically for the US market according to our customer needs. Noble 3032 conforms with ASSE 1037.

Before Choosing A New Faucet,
THINK FINISH FIRST

New technology and an increasing appreciation for purposeful design in public bathrooms have made the faucet an important feature in bathroom decor.

STAINLESS STEEL AISI 316

Stainless steel faucets do not need finishing. The material itself is the finish and it offers corrosion resistance, formability, strength, and easy maintenance. Combining elegant design with vandal resistant features, now more resilient than ever, our Stainless Steel AISI 316 series is long lasting even under the harshest conditions.

POLISHED CHROME

Resistant to rust and corrosion, chrome is both cost-effective and easy to clean. The graceful chrome-plated finish is created through electroplating, which applies a liquid metal coating through electro deposition. As the deposited metal fuses to the base material, the refined and durable finish created is Stern’s collection default.

MATT BLACK

Powder coating is a finishing process in which a coating is applied electrostatically to a surface as a dry powder before heat is used to finalize the coating. The powder forms chemical bonds in the process, creating a flexible, durable finish that is highly resistant to corrosion, flaking, and scratching. Exceptionally versatile and easy to clean, powder coating does not show dirt, water spots, or fingerprints.

PVD COATING

PVD coating (physical vapor deposition) is the process in which a solid material is vaporized in a vacuum and deposited onto the surface of the fixture. These compound materials are deposited atom by atom, forming a thin, bonded, metal surface layer that greatly improves appearance and durability. Selected products are available in a variety of special finishes:

PVD BRUSHED NICKEL

Popular for its “stainless steel” appearance, PVD Brushed Nickel creates a sophisticated and cool look that hides fingerprints and water spots.

PVD COPPER

A velvety effect that goes well with contemporary and industrial styles.

PVD GUN METAL

Inspired by rifle barrels with a sheen that’s not quite matte and not quite shiny, gunmetal faucets add an interesting touch to any design, particularly when paired with industrial elements.

PVD ANTIQUE BRONZE

Dramatic and striking, antique bronze lifts the ambiance with a touch of texture.
