DISCOVER STERN'S TOUCHLESS WC CUBICLES

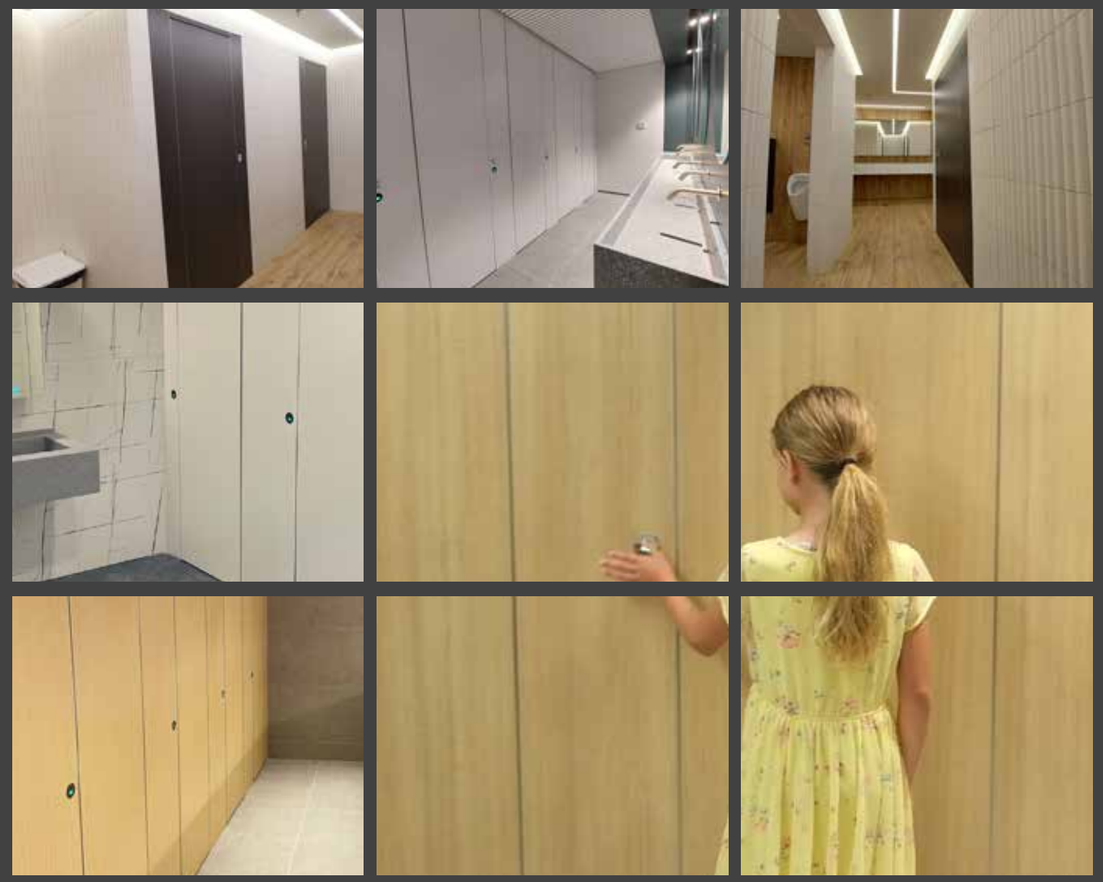
ENHANCE RESTROOM EXPERIENCE WITH **TOUCHLESS WC CUBICLES** AND OCCUPANCY INDICATORS

- Optimizing Surface Hygiene and Minimizing the Risk of Cross Contamination
- Quick & Easy Installation
- Intuitive and Simple Use
- Safe and Reliable
- Minimal Maintenance and Failure-Free

MINIMIZE CONTACT WITH SURFACES AS MUCH AS POSSIBLE

Since 1989, Stern - one of the pioneers in touchless sanitary products for public toilets – has been producing touchless faucets, soap dispensers, flush valves and hand dryers. But what about the contact applied to open the door of the WC cubicles?

Now you can ensure optimal surface hygiene and minimize the risk of cross-contamination using Stern's touchless bathroom cubicles.



For more details about Stern's touchless cubicles please contact:
info@sternfaucets.com

WHY STERN?

Stern blends cutting-edge technological innovation, foresight, ease of use, and impeccable style, all in a single package. A world leader in the sanitary market for nearly 36 years, Stern develops and manufactures touchless faucets, automatic soap dispensers, flush valves, shower controls, and a multitude of related accessories.

Equipped with advanced technologies and machines run by a talented team of over 300 people, Stern creates an extensive product line for both commercial and residential installations. Every product at Stern is visionally conceived, practically engineered, and successfully launched to improve the user experience around the globe.

By marrying our market intuition with our technological know-how, we create electronic products that effectively and efficiently answer global needs in line with international standards and expectations. We remain wholeheartedly committed to green building and water-efficiency to help minimize the use of water and energy.

And as we produce everything in-house, we are able to adjust, combine, upgrade and resize to your hearts' desire, keeping Stern at the very forefront of world technology and design.

STERN LEADS THE WAY

The Leadership in Energy and Environmental Design (LEED) is a certification developed by the USBCG (United States Green Building Council) – an organization dedicated to environmentally conscious construction. The LEED certification encourages sustainable building practices and promotes environmental preservation. Among the key issues measured by the organization are water and energy efficiency.

The certification is based on a points system, with a minimum of 2 points awarded for a 25% water usage reduction, with a maximum of 6 points for a 50% reduction. The USBCG applies its LEED certification points system to a wide variety of construction projects: commercial buildings, office buildings, schools, hospitals, hotels, and more.

With water conservation as one of our main goals, Stern has developed a line of products with extremely high water efficiency. Our products provide a minimum of 30% water reduction (worth 4 points) and up to to 58% water reduction (worth 6 points). Stern products are the best way for any construction project to achieve the highest score in the water efficiency category of the LEED certificate.

Stern products and LEED points

SOURCE: LEED V4.1, UPDATED: JANUARY 2022

Commercial Fixtures, Fittings, and Appliances	LEED Baseline (IP Units)	LEED Baseline (SI units)	Stern Best solutions (IP Units)	Stern Best solutions (SI Units)
Flush valves for toilets	1.6 gallons per flush (gpf)	6 liters per flush (lpf)	Single Flush: 1.28 gpf Average Dual Flush: 0.89 gpf	Single Flush: 4.8 lpf Average Dual Flush: 3.37 lpf
Flush valves for urinals	1.0 gpf	3.8 lpf	0.125 gpf	0.5 lpf
Public lavatory (restroom) faucets	0.5 gallons per minute (gpm) at 60 psi except private applications	1.9 liters per minute (lpm) at 415 kPa, except private applications	0.35 gpm at 50 psi	1.32 lpm at 350 kPa
Shower heads	2.5 gpm at 80 psi per shower stall	9.5 lpm at 550 kPa per shower stall	1.06 gpm at 50 psi per shower stall	4.0 lpm at 350 kPa per shower stall

ALWAYS COMMITTED TO GREEN BUILDING AND WATER-EFFICIENT PRODUCTS

WHAT'S NEW?

SWAR New Options

The newest version of SWAR has been fitted with a concealed screen for broadcasting news and advertising, to be viewed while users wash, soap and dry their hands in your commercial washroom. The lockable mirror conceals the screen completely and the tablet is only visible when needed, creating a sophisticated approach to elegant advertising.

Page 83

Boreal Faucet & Soap Dispenser

Water & soap come together, perfectly matched, with this stellar looking pair. Sharp contours and straight lines infuse this minimalistic square design with a futuristic charm.

Page 8, 52

Csaba 2 in 1

Csaba 2-in-1, a touch-free deck-mounted electronic faucet and soap dispenser duo in a single unit, is ideal for retrofit projects where drilling a new basin opening is not possible.

Page 6

Recessed Duo

The Recessed Mounting Duo is our concealed soap-water modular system in a Stainless Steel box for integration inside the wall, concealed inside the wall and behind a mirror or panel for the cleanest and most minimalistic design.

Page 88

Stern Trio

Complete solution for hand washing and drying. Eliminate those messy, slippery floors with Stern's all-in-one handwashing solution for either deck or wall-mounted designs.

Page 135

Proprietary Soap Adaptor kits

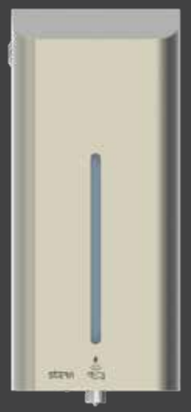
Fully committed to your soap supplier but want to enjoy the ease, comfort and sustainability offered by Stern's touch-free soap dispensers? Fret no more! We have the ultimate solution for you to continue using your proprietary soap: Stern's Proprietary Soap Adaptors.

Page 77, 146

Easy Refills

Lotus Top fill 2 liters container is easy to refill with your choice of hand soap. Our new touch-free deck-mounted soap dispenser's body is made of 100% Chrome plated brass, including the smart cap that allows to refill from the top.

Page 53



Smartbox

Our Smartbox touch-free electronic hand sanitizer dispenser for wall-mounted installations is ideal for refurbishment projects.

Page 78

Cool TF

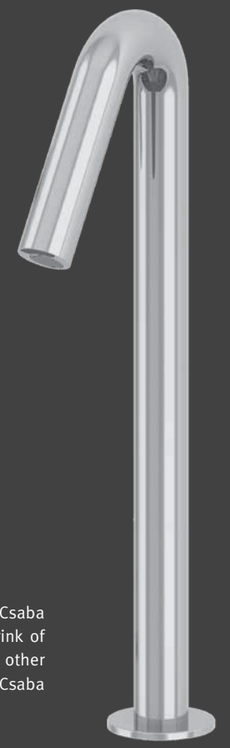
Long and slender, Cool TF is perfectly curved to serve. Ideal for filling bottles in public washrooms to help conserve water while limiting the spread of germs and bacteria.

Page 28

Csaba Petite Set

Petite and just the right size, our Csaba Petite Set is the ideal choice for spaces that require elegant subtlety and an air of refined sophistication.

Page 7, 49



Csaba Plus

Take your spirits higher with our newest Csaba model Csaba Plus, for a taller, loftier drink of water. About 1.5 times longer than the other Csaba counter top washbasin models, Csaba Plus raises handwashing to new heights.

Page 7

Before Choosing A New Faucet,

THINK FINISH FIRST

New technology and an increasing appreciation for purposeful design in public bathrooms have made the faucet an important feature in bathroom decor.

STAINLESS STEEL AISI 316

Stainless steel faucets do not need finishing. The material itself is the finish and it offers corrosion resistance, formability, strength and easy maintenance. Combining elegant design with vandal resistant features, now more resilient than ever, our Stainless Steel AISI 316 series is long lasting even under the harshest conditions.

POLISHED CHROME

Resistant to rust and corrosion, Chrome is both cost-effective and easy to clean.

The graceful Chrome-plated finish is created through electroplating, which applies a liquid metal coating through electro deposition. As the deposited metal fuses to the base material, the refined and durable finish created is Stern's collection default.

MATTE BLACK

Powder coating is a finishing process in which a coating is applied electrostatically to a surface as a dry powder before heat is used to finalize the coating. The powder forms chemical bonds in the process creating a flexible, durable finish that is highly resistant to corrosion, flaking and scratching.

Exceptionally versatile and easy to clean, powder coating does not show dirt, water spots, or fingerprints.

PVD COATING

PVD coating (physical vapor deposition) is the process in which a solid material is vaporized in a vacuum and deposited onto the surface of the fixture. These compound materials are deposited atom by atom, forming a thin, bonded, metal surface layer that greatly improves appearance and durability.

Selected products are available in a variety of special finishes:

PVD BRUSHED NICKEL

Popular for its "stainless steel" appearance, PVD Brushed Nickel creates a sophisticated and cool look that hides fingerprints and water spots.

PVD COPPER

A velvety effect that goes well with contemporary and industrial styles.

PVD GUNMETAL

Inspired by rifle barrels with a sheen that's not quite matte and not quite shiny, gunmetal faucets add an interesting touch to any design, particularly when paired with industrial elements.

PVD ANTIQUE BRONZE

Dramatic and striking, antique bronze lifts the ambiance with a touch of texture.

CSABA 2-IN-1 SERIES

Electronic lavatory faucet and soap dispenser operated by IR sensor

Touch-free deck-mounted electronic faucet and soap dispenser in a single unit that are activated by concealed sensors built into the spouts.

Ultimate retrofit option as it only requires a single hole in the deck for a touch free faucet and soap dispenser.

TRENDY T SERIES

Electronic lavatory faucet operated by IR sensor

Features an integrated thermostatic mixer for an anti scalding operation and temperature control.

Trendy T ensures the water is temperature-balanced and helps prevent users from burning their hands.

Additional Advantages:

- Lead free
- Thermostatic control for optimal temperature
- Including an internal comfort stopper that allows you to set the maximum temperature according to your preference
- Ideal for the healthcare sector
- Internal solenoid valve

TEMPERATURE FEATURES

HOT LIMIT STOPPER - Mechanical mechanism for built in maximum temperature control at 48.9°C (120°F), factory set. Other values available upon request

COMFORT STOP - Option to limit the hot water temperature from 38°C (100.4°F) to 48.9°C (120°F).

FIXED TEMPERATURE - Allows the technical staff to set a consistent temperature and fix the faucet cap to a specific temperature.

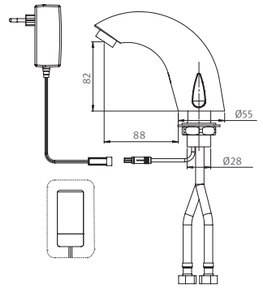
EASY

Cold or premixed water

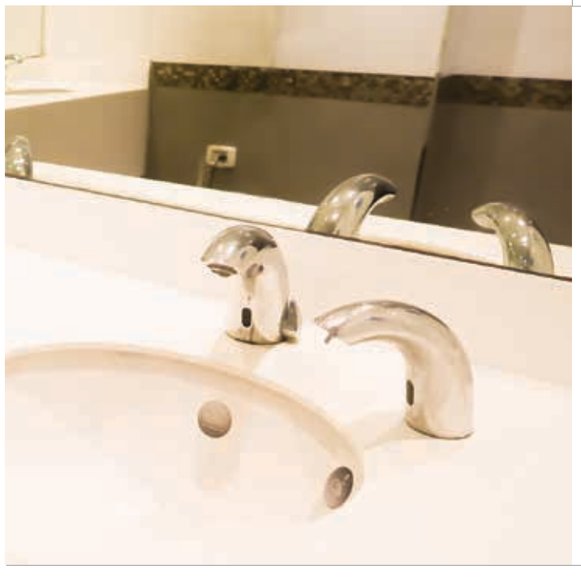
- 246010 **EASY B,** 9V Battery
- 246020 **EASY E,** 9V Transformer



EASY 1000

Option to remove the mixing handle to allow maintenance staff only, to adjust water temperature

- 246050 **EASY 1000 B,** 9V Battery
- 246060 **EASY 1000 E,** 9V Transformer



EASY WITH COVERPLATE
see page 145

SWAN SERIES

Electronic lavatory faucet operated by IR sensor

Series includes options for cold or premixed water as well as hot and cold water.

Furthermore, this series includes a solenoid valve, located inside the product, which makes it more resistant to vandalism.

WATER SAVING OPTIONS		
6 LPM	1.58 GPM	SSR PCA STREAM
4 LPM	1 GPM	PCA Spray
3 LPM	0.8 GPM	PCA SPRAY

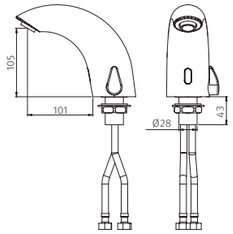
SWAN 1000 AB1953

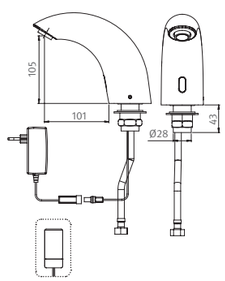
Mixer to adjust water temperature

- 252210 **SWAN 1000 AB1953,** Internal 9V Battery



SWAN 1010 B/E AB1953

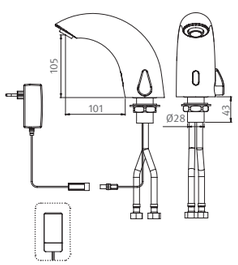
- 250310 **SWAN 1010 B AB1953,** 9V Battery
- 250420 **SWAN 1010 E AB1953,** 9V Transformer



SWAN 1000 B/E AB1953

Mixer to adjust water temperature

- 252310 **SWAN 1000 B AB1953,** 9V Battery
- 252420 **SWAN 1000 E AB1953,** 9V Transformer



CONDOR SERIES

Electronic lavatory faucet operated by IR sensor

For cold or premixed water.

IP67 Dual power input box that allows the faucet to be used with a 9V battery. Can be also be powered by a 9V transformer which includes an integrated backup system to be used with a 9V Lithium battery. This enables the product to be used normally in case of a power failure.

WATER SAVING OPTIONS		
6 LPM	1.58 GPM	SSR PCA STREAM
4 LPM	1 GPM	PCA Spray
3 LPM	0.8 GPM	PCA SPRAY
1.89 LPM	0.5 GPM	PCA Spray

Long spout 220 mm

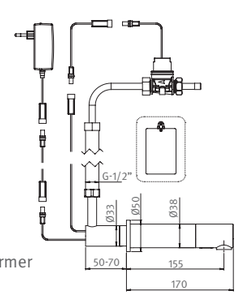
- 350910 **TUBULAR 1000 LB BOX,** 6 x 1.5 AA Batteries
- 350960 **TUBULAR 1000 LE BOX,** 9V Transformer



TUBULAR C

Installation from ceiling

- 350300 **TUBULAR CB,** 6 x 1.5 AA Batteries
- 350400 **TUBULAR CE,** 9V Transformer

TUBULAR WAVE DP LE

Electronic wall mounted faucet operated by wave on-off IR sensor

For cold or premixed water. Options for installation with iron frame. When powered by a 9V transformer features an integrated backup system to be used with a 9V Lithium battery, which enables the product to be used normally in case of a power failure. Allows activation of the faucet once the users place their hands at a close proximity to the sensor. Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 8 seconds will pass. The flow time is adjustable on site by remote control.

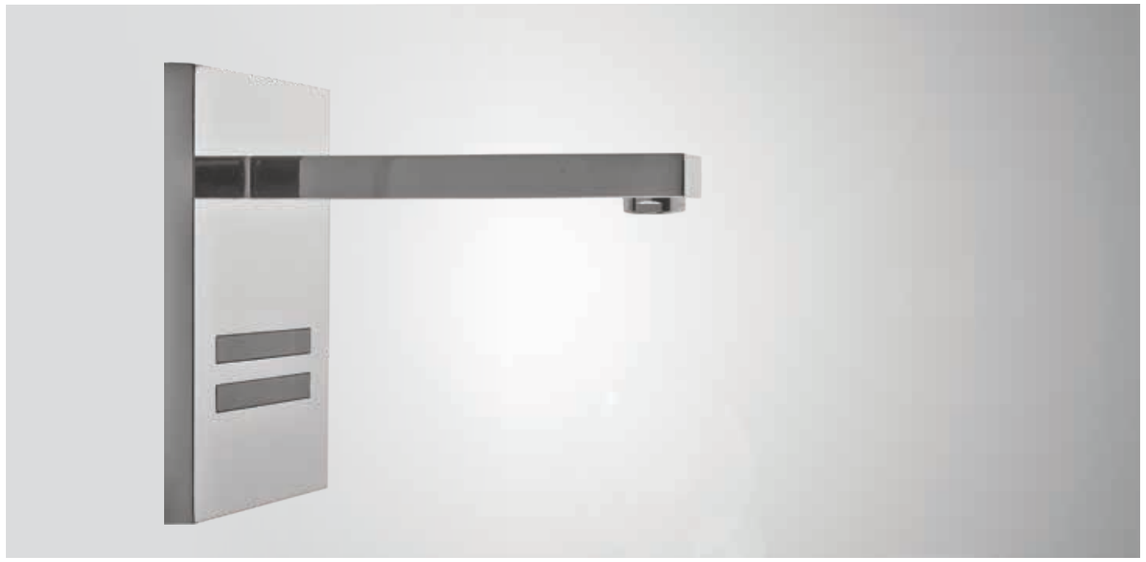
NARA Q

Concealed installation in concrete or brick walls

- 360510 **NARA Q,** 9V Battery
- 360500 **NARA QE,** 9V Transformer



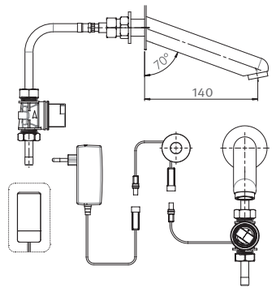
APOLLO AL SERIES

Electronic wall mounted faucet operated by IR sensor

For cold or premixed water.

Includes options for wave or prox operation, and accessories for brick wall installation.

WATER SAVING OPTIONS		
6 LPM	1.58 GPM	SSR PCA Stream
4 LPM	1 GPM	PCA Spray
3 LPM	0.8 GPM	PCA Spray
1.89 LPM	0.5 GPM	PCA Spray
1.3 LPM	0.35 GPM	PCA Spray



APOLLO AL

Concealed installation in dry walls.
Default Wave activation: Once the users place their hands at a close proximity to the sensor. Water will continue to flow unless the user places their hands again, at a close proximity to the sensor again or once a factory set flow time of 8 seconds will pass. The flow time is adjustable on site by remote control.

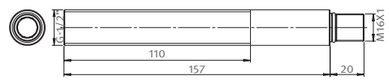
Optional Prox activation:
Automatic activation when the users bring their hands within the sensor range, and stops when the users remove their hands.

- 340600 **APOLLO ALB,** 9V Battery
- 340700 **APOLLO ALE,** 9V Transformer

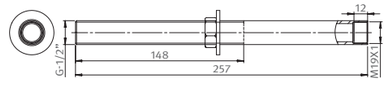
APOLLO AL EXTENSIONS

For brick wall installations.

- 07240060 **EXTENSION KIT APOLLO AL**



- 07240061 **EXTENSION KIT FOR WAVE / PROX SENSOR (REQUIRES A SPECIAL MATCHING SENSOR)**



MEDICAL SERIES

Electronic wall mounted faucet operated by IR sensor

Features an integrated thermostatic mixer to prevent scalding operation and temperature control.

Furthermore, this series includes a solenoid valve, located inside the product, which makes it more resistant to vandalism.

APOLLO FREE

Exposed installation

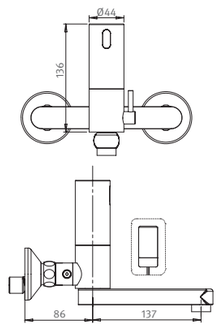
- 340100 **APOLLO FREE,** Internal 9V Battery

WASHFREE 1000

Electronic wall mounted faucet operated by wave IR sensor

For cold or premixed water. Includes option for a longer bracket.

WATER SAVING OPTIONS		
6 LPM	1.58 GPM	SSR PCA Stream
4 LPM	1 GPM	PCA Spray
3 LPM	0.8 GPM	PCA Spray
1.89 LPM	0.5 GPM	PCA Spray
1.3 LPM	0.35 GPM	PCA Spray



WASHFREE 1000

Exposed installation

Allows activation of the faucet once the users place their hands at a close proximity to the sensor. Water will shut off if the users place their hands at a close proximity to the sensor - again or once a factory set flow time of 8 seconds will pass. The flow time is adjustable on site by remote control.

With a mixer for water temperature adjustment for hot and cold water.

- 316010 **WASHFREE 1000,** 9V Battery
- **Long bracket 200 mm available upon request**

PROX, WAVE & TOUCH SOLUTIONS

Touch-free & Touch operated faucet kits operated by an IR sensor or a Piezo button

To be integrated in a faucet application to deliver water with or without touch.

For cold or premixed water.

Touch-free Operation Advantages:

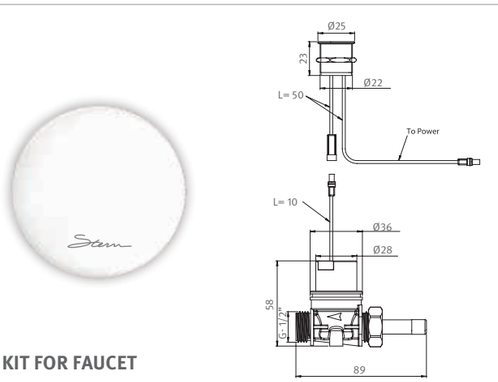
- Drastically reduces water consumption
- No physical contact. Helps to protect users against cross contamination
- Sensor settings adjustable by remote control

Touch Operation Advantages:

- Drastically reduces water consumption
- Non hold open feature
- More possibilities to save water: the water flow can be stopped in the middle of the cycle
- Stable and accurate water flow that can be changed on site

Prox Sensors with Special Finishes

Touch-free prox sensor operation now available in a wide variety of special finishes to complete the interior design of your commercial restroom.

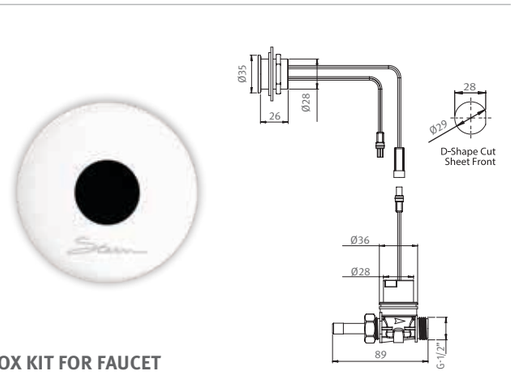


APS KIT FOR FAUCET

Touch operation

Allows activation of the faucet/ unit once the users touch the designated area of the Piezo button. Water will shut off if the users touch the designated area again or once a factory set flow time of 8 seconds will pass.

- 07225008 **APS KIT FOR FAUCET,** 9V Battery / 9V Transformer (not included)



PROX KIT FOR FAUCET

Touch-free prox operation

Allows automatic activation when the users bring their hands within the sensor range, and stops when the users remove their hands. IP67 including black battery box with 6AA 1.5V alkaline batteries

- 620200 **PROX KIT FOR FAUCET,** 9V Battery / 9V Transformer
- 620200 **PROX KIT WITH DETACHABLE BODY FOR FAUCET** 9V Battery / 9V Transformer

Prox Kit with detachable body for faucet

WAVE KIT FOR FAUCET

Touch-free wave operation

Allows activation of the faucet/ unit once the users place thier hands at a close proximity to the sensor.

Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 8 seconds will pass.

The flow time is adjustable on site by remote control.

- 620400 **WAVE KIT FOR FAUCET,** 9V Battery / 9V Transformer
- 620400 **WAVE KIT WITH DETACHABLE BODY FOR FAUCET** 9V Battery / 9V Transformer

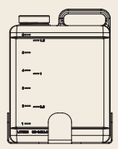
- 233107 **CSABA SD PLUS E 6-PACK,** 12V Transformer

CSABA SD 1.6 E

Delivers liquid soap

1.6 gallon (6L) tank kit for an individual soap dispenser

- 233102 **CSABA SD 1.6 E,** 12V Transformer



NEW!

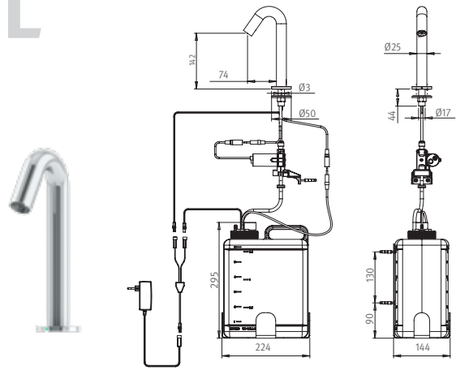
CSABA SOAP DISPENSER
WITH SOAP LEVEL INDICATOR

Deck-mounted touch-free electronic soap dispenser for non-proprietary soap

Features:

- Soap level indicator shows green when soap tank is full, orange when soap level is low and red when the tank is empty
- Concealed IR sensor integrated into the spout
- Delivers liquid soap
- Peristaltic pump
- 1.6 US gallon (6L) soap tank

6L



CSABA SOAP DISPENSER WITH SOAP LEVEL INDICATOR

- 233105 **CSABA SOAP DISPENSER E WITH LEVEL INDICATOR,** 12V Transformer

NEW!

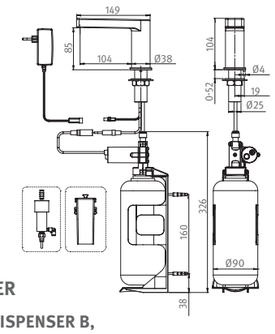
BOREAL SOAP DISPENSER

Deck-mounted touch-free electronic soap dispenser for non-proprietary soap

Features:

- Chrome plated brass body
- Delivers liquid/foam soap
- Peristaltic pump
- Adjustable settings

1L



BOREAL SOAP DISPENSER

- 212100 **BOREAL SOAP DISPENSER B,** Battery box for six (6) D batteries

NEW!

LOTUS TOPFILL E

An innovative deck-mounted soap dispenser for all types of liquid soap

The main features and benefits of the Lotus Top Fill:

- A 100% chrome-plated brass structure
- Delivers liquid/foam soap
- An enlarged 2 liter tank
- Peristaltic pump preventing back-flow and clogging
- A smart cap that enables easy filling from the top
- A soap level indicator LED that alerts you if the container is full, empty, and when you've reached maximum fill.
- A variety of finishes: chrome, PVD brushed nickel, and matte black
- Matching touch-free faucet available
- Soap dosage and sensor range adjustable by remote control

Includes: Six (6) liquid soap dispenser units
One (1) remote control

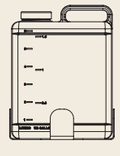
- 351921 **QUADRAT 2030 SD B 6-PACK,** Battery box for six (6) D batteries
- 351931 **QUADRAT 2030 SD E 6-PACK,** 12V Transformer

QUADRAT 2030 SD 1.6 E

1.6 gallon (6L) tank kit for an individual soap dispenser

- 351316 **QUADRAT 2030 SD 1.6 E,** 12V Transformer



MULTIFEED KITS

Installation kit for more efficient maintenance of multiple soap dispensers. Saves time and money, can supply up to six soap dispensers from one large capacity 1.6 gallon (6L) tank. Ideal for high traffic areas with multiple hand washing stations in high traffic restrooms. Enables productive refill of multiple soap dispensers through a single top fill unit above deck and an LED indicator that lets maintenance staff know when soap levels are low. Suitable for any foam or liquid soap with the recommended viscosity.

Features:

- Allows multiple soap dispensers installation (up to six (6) dispensers) with a single 1.6 US gallon (6L) tank
- Stainless Steel tank support or lockable underbasin cabinet

Options:

- Anti-theft top filling brass mechanism for easy refill from the counter top
- Soap level indicator
- Below deck filling mechanism
- **NEW:** Plywood HPL (High Pressure Laminate) lockable cabinet with level indicator window. White panel and oak style frame for 1.6 Gallon (6L) soap tank with option to house the 33.8 FL OZ (1L) soap bottle as necessary. Hides unsightly pipes and connectors from the view of users.

Advantages:

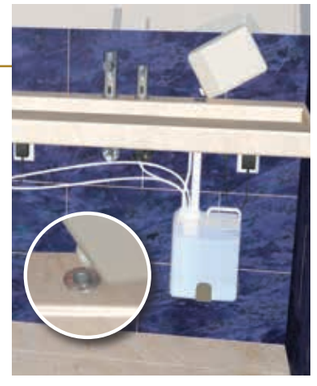
- Drastically reduces soap consumption
- Cross contamination protection - no physical contact
- Maximized savings - can be used with any non-proprietary soap
- Easy installation
- Fast and simple refill with optional LED indication of soap level
- Highly durable - with optional vandal-resistant top-filling mechanism

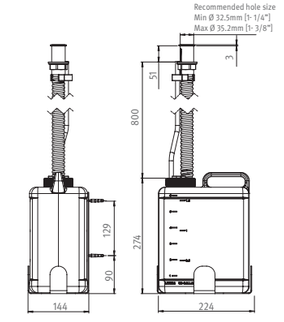
TOP-FILLING MULTIFEED KIT WITH SOAP LEVEL INDICATOR

Vandal-resistant chrome-plated top-filling brass mechanism. LED soap level indicator.

Power splitter for connection to transformer powered MF soap dispenser.

Stainless steel tank support.





- 07220152

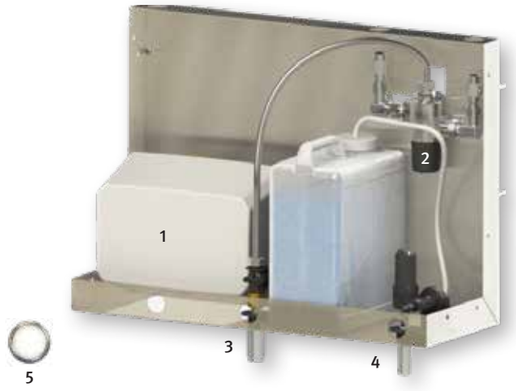
with Tubular duo

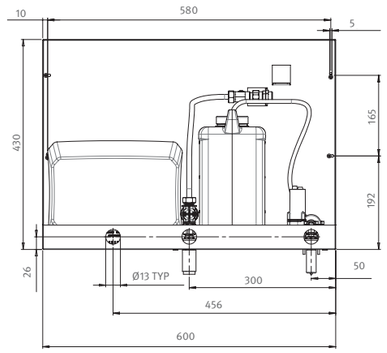
SWA HI-SPEED MODULE

Complete system including high speed hand dryer, thermostatic mixing valve, touch-free faucet, liquid soap dispenser and optional lamp soap level indicator

- Ready to be integrated behind the mirror for a clear, minimalistic design
- Eliminates messy, slippery floors and hand drying queues
- Reduces the amount of labor for commercial facilities maintenance
- Easy installation with a stainless steel frame to be fixed to the wall
- Ideal touch-free soap-water-air cycle
- Helps prevent cross contamination
- Reduces water and soap consumption
- To be used with non-proprietary soap
- Drying time: less than 15 seconds



Complete system including high speed hand dryer (1), thermostatic mixing valve (2), touch-free faucet (3) liquid soap dispenser (4) and optional lamp soap level indicator (5)



- 280410 12V transformer

TAILORED TO YOUR NEEDS:

The SWA Module's complete version includes a touch-free soap or foam dispenser, faucet, thermostatic mixing valve and hand dryer. Each component can be delivered individually with any combination you prefer.

* System including paper dispenser instead of hand dryer also available upon request

Modular system including high speed hand dryer (1), touch-free faucet (2) and liquid soap dispenser (3) and optional lamp soap level indicator (5)

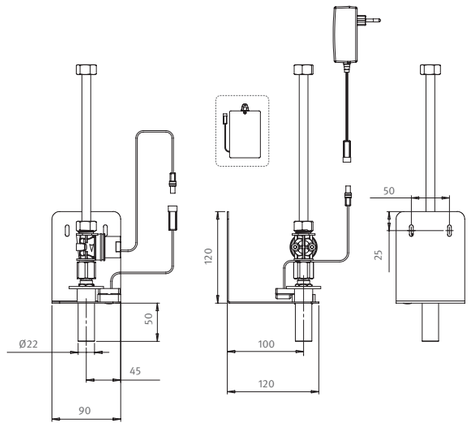
BTM FAUCET

Electronic wall-mounted faucet for integration behind the mirror

- Drastically reduces water consumption
- No physical contact. Helps to protect users against cross contamination
- Sensor settings adjustable by remote control
- Easy installation behind the mirror
- Matching IR operated soap dispenser

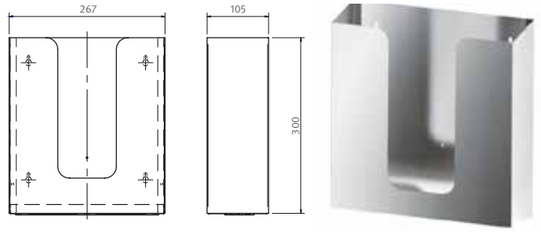


- 280310 **BTM B,** Battery box for 6 x 1.5V AA batteries
- 280300 **BTM E,** 9V transformer

BTM PAPER TOWEL HOLDER

- 316 Stainless steel
- For integration behind the mirror as part of the SWA electronic wall mounted system
- Easy installation
- Saves space and functional solution that accommodates standard paper towels from your favorite brands (paper towels not included)

- 03300148 **PAPER TOWEL HOLDER**



BTM SOAP DISPENSER

Touch-free electronic soap dispenser for integration behind the mirror

- Drastically reduces soap consumption
- No physical contact. Helps to protect users against cross contamination
- Peristaltic pump. The soap is driven inside the soap tube without contact with the pump, preventing contamination and back flow
- Accurate soap dosage
- To be used with non-proprietary soap for maximum savings
- Easy to install and refill
- Matching IR operated faucet

NEPTUNE SHOWER PANELS

Electronic Shower Panel

Operated by IR sensor. Series includes options for wave or prox operation, cold or premixed water as well as thermostatic controlled hot and cold water.

Default Wave Operation:
Allows activation of the shower once the users place their hands at a close proximity to the sensor. Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 120 seconds will pass. Flow time is adjustable by remote control.

Optional Prox Operation:
Allows automatic activation when the users are within the sensor range, and stops when the users go out of the sensor range.

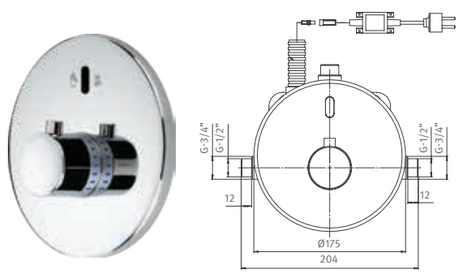
NEPTUNE 1042 T

ELECTRONIC SHOWER CONTROL

Operated by IR sensor

Series includes options for wave or prox operation.Features an integrated thermostatic mixer for anti scalding operation and temperature control.



NEPTUNE 1042 T

Exposed installation

- 612280 **NEPTUNE 1042 T,** Internal 9V battery
- 612281 **NEPTUNE 1042 TE,** 9V Transformer

Concealed installation in concrete or brick walls.

Thermostatic mixing handle to adjust water temperature

Allows activation of the shower once the users place their hands at a close proximity to the sensor.

Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 120 seconds will pass.

The flow time is adjustable on site by remote control.

Optional
Prox Operation:

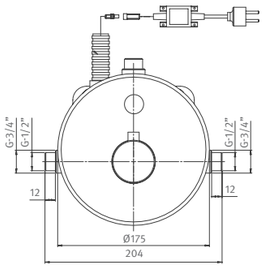
Allows automatic activation when the users comes within the sensor range, and stops when the users leave the sensor range.

PERFECT TIME 1042 T

ELECTRONICALLY OPERATED SELF CLOSING SHOWER CONTROL ACTIVATED BY TOUCH

Operated by a Piezo button integrated in the shower control

Features an integrated thermostatic mixer for an anti scalding operation and temperature control.



PERFECT TIME 1042 T

Concealed installation in concrete or brick walls

- 612253 **PERFECT TIME 1042 T,** Internal 9V battery
- 612254 **PERFECT TIME 1042 TE,** 9V Transformer

Thermostatic mixing handle to adjust water temperature

When a user touches the designated area in the middle of the Piezo element a flow cycle of 120 seconds is activated.

If the user wants to stop the water flow, he can touch the piezo area again before the default time has passed, thus, saving more water.

NEPTUNE MEDICAL

ELECTRONIC SHOWER CONTROL

Operated by IR sensor

Features an integrated thermostatic mixer for anti scalding operation and temperature control.

Allows activation of the shower once the users place their hands at a close proximity to the sensor. Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 120 seconds will pass. Flow time is adjustable by remote control.

Optional Prox Operation:
Allows automatic activation when the users comes within the sensor range, and stops when the users leave the sensor range.

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.

	PROGRAMMABLE PIEZO KIT FOR SHOWER	Concealed installation in dry or plaster wall. Option for front fixation installation in concrete, brick walls. **Touch Operation** Allows activation of the shower / unit once the users touch the designated area in the Piezo button. Water will shut off if the users touch the designated area again or once a factory set flow time of 120 seconds will pass.	9V battery / 9V transformer	07225019		APS THREADED ROD KIT SHOWER	Threaded rod solution for piezo kits installations in thick walls. Kit includes Piezo switch, threaded rod with rosette and solenoid valve. **Touch Operation** Allows activation of the shower / unit once the users touch the designated area in the Piezo button. Water will shut off if the users touch the designated area again or once a factory set flow time of 120 seconds will pass.	9V battery / 9V transformer	07226054		PPS HIGH SECURITY KIT FOR SHOWER	Specially designed for high security environments. The kit includes a shower head and piezo switch that are incorporated in a brass sleeve. For concealed installation in concrete, brick walls.	Not included	07226033		PROGRAMMABLE PIEZO KIT FOR BEACH SHOWER COLUMNS	Self-closing piezo kit for showers. Activated by touching the designated area. Kit includes a programmable piezo switch, solenoid valve with housing. Filter and valve are located in the IP67 waterproof dual power input box. The shower will automatically shut off after a factory set flow time of 30 seconds would pass. Flow time adjustable on site if required. Dual power input box can be used to operate the product by battery or transformer. When used with a transformer it has an integrated automatic battery backup.	9V battery / 9V transformer	07226050		PERFECT TIME SH CONTROL ASSEMBLY WPC	Electronically operated self closing shower panel operated by touch. Operated by a Piezo button in the shower panel. Includes the control panel only. Electronically operated self closing aluminum shower panel operated by a Piezo touch button. Includes the control panel only. No moving parts, ideal for heavy duty areas. Non hold open feature. Aluminum panel with Epoxy coating for high corrosion resistance. Provides a retrofit solution for old shower systems.	Not included	07040312	
FOOT WASHFREE

ELECTRONICALLY OPERATED SELF CLOSING FOOT WASHER ACTIVATED BY TOUCH

Operated by a Piezo element integrated in the foot washer cap.
For cold or premixed water.
Ideal for swiming pools, beaches and ritual foot washing.
Heavy duty chrome plated brass construction.
Silicone nozzles for easy cleaning.

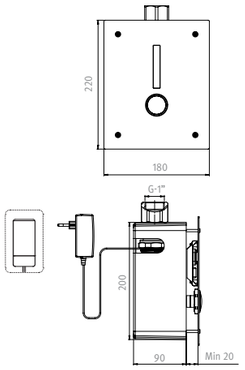
NOBLE 2032 SERIES

Concealed electronic flush valve for toilet, operated by an IR sensor

Features a dual flush IR system. Includes models with a Piezo override flush activator switch giving the user the possibility of alternative manual touch activation.Flushing duration and other settings are adjustable by remote control.

Dual flush: Water will flush after the user moves away from the toilet. If the user spends less than one minute in front of the sensor a half flush (3 liters) will take place. For more than one minute in front of the sensor a full flush (4.5 liters) will take place.

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.



NOBLE 2032

Dual flush operation

With a mechanical override flush button

Iron frame available

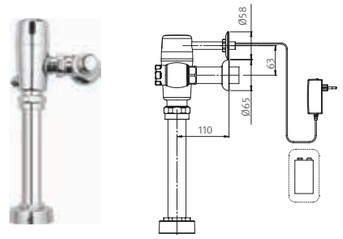
VENUS 3003R PE

Designated for high security locations

Operated by remote activation wish piezo button located in the inmate's cell, while the flush valve body is concealed in the service area.
Each activation gives a pre-set run cycle

Allows activation of the toilet once the user touches the designated area in the Piezo button

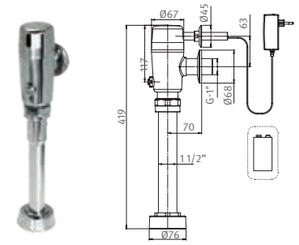
- 420280 **VENUS 3003R PE,** 9V Transformer



VENUS 3002 R

Side inlet
Manual override flush activator button
Allows automatic activation when the users have left the toilet

- 420241 **VENUS 3002 R ,** Internal 9V battery
- 420265 **VENUS 3002 RE,** 9V Transformer



VENUS 3002

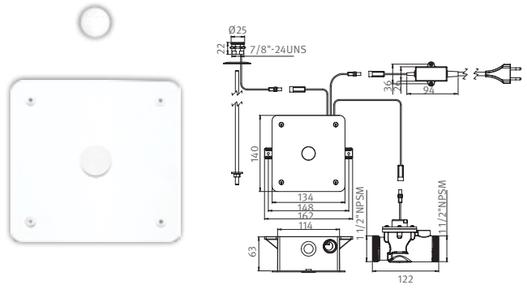
Rear inlet
Features a mechanical override push button to enable manual operation. Dual flush version available

- 420255 **VENUS 3002 ,** Internal 9V battery
- 420231 **VENUS 3002 E,** 9V Transformer

APS KIT FOR TOILETS
WITH DISTANT CONTROL

Electronically operated self closing flush valve for toilet with distant control

Designated for special needs or high security locations. Can be operated by a Piezo button located in the toilet area, or using the remote panel for alternative operation. Each activation gives a pre-set run cycle.



PIEZO KIT FOR W.C. WITH DISTANT CONTROL

Suitable for duct concealed installations (plaster walls)
Default Special needs version:

Includes a BPS Piezo switch to be installed in the toilet area for standard operation and a remote panel to be installed in a remote location for an alternative easy activation.

Suitable for duct concealed installations (plaster walls)
Optional High security version:

Includes a BPS switch located in the inmate's cell that allows to flush the toilet, while the flush valve body is concealed in the service area.
The remote panel, installed outside the cell, allows disabling the system to performe sudden search procedures for drugs or weapons. Includes a Red ring of light indication when the system is disabled.
Once disabled, the system can be enabled manually by the prison personnel or automatically after one hour.

- 07226042 **PIEZO KIT FOR W.C. WITH DISTANT CONTROL,**
  9V Transformer

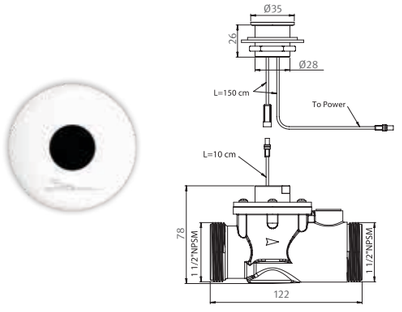
PROX, WAVE & TOUCH SOLUTIONS

Touch free & Touch operated flush valve for toilet kits

Electronic modular flush valve for toilet for installation in the wall or panel. Flushing duration and other settings are adjustable by remote control.

Prox Sensors with Special Finishes
Touch free prox sensor operation now available in a wide variety of special finishes to complete the interior design of your commercial restroom.

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.



PROX / WAVE KIT FOR TOILETS

Suitable for duct concealed installations (plaster walls)
Available with detachable body

Touch free Operation
Allows automatic activation when the users have left the toilet.

- 620100 **PROX KIT FOR TOILETS,**
  9V Transformer / 9V battery (not included)
- 620600 **WAVE ON/OFF SENSOR KIT FOR TOILET,**
  9V Transformer / 9V battery (not included)

APS KIT FOR TOILETS

Suitable for duct concealed installations (plaster walls)

Touch Operation
Allows activation of the toilet once the users touch the designated area in the Piezo button.

- 07225018 **APS KIT FOR TOILETS,**
  9V Transformer / 9V battery (not included)

PROX & WAVE SENSOR KIT
FOR TOILET WITH PRIMARY FLUSH

This kit is designed to operate a two volumes flush valve. The sensor detects the user at a given distance, and operates an automatic flush using the sensor's prox function once the user has left the toilet. Depending on time and distance, the systems delivers 3 liters to evacuate liquids and 6 liters to evacuate solids. To maximize hygiene, the system allows the user upon arriving to the toilet to operate a primary cleaning flush using the sensor's wave function.

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.

PROX & WAVE SENSOR KIT FOR TOILET

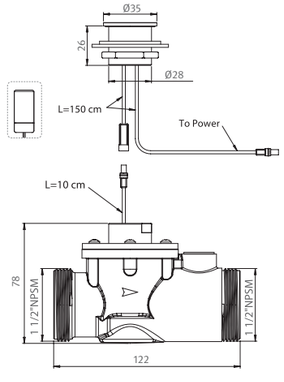
Suitable for duct concealed installations (plaster walls).

Primary cleaning flush
Allows the user to operate a cleaning flush before using the system.

The 3 liters flush takes places when the user presents his hand at a short distance at the front of the sensor.

Dual Flush
The system will operate a half flush (3 liters) or a full flush (6 liters) based on a time and distance equation.

- 620100 -Prox/Wave **PROX & WAVE SENSOR KIT FOR TOILET,**
  9V Battery / 9V Transformer (not included)

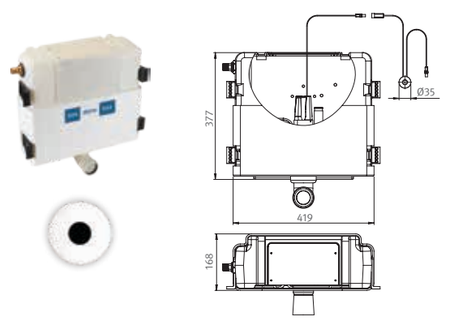


ELECTROMAGNETIC CISTERN SYSTEM

Concealed electronic flushing system for cistern activated by an infrared wave sensor

Options for a single or dual flush activations. Includes an integral overflow pipe (warning pipe) to prevent flooding, and two integrated filters.
Pre-flush optional upon request. Hygiene flush is included.
Flushing duration and other settings are adjustable by remote control. 72 hours hygiene flush after every activation.

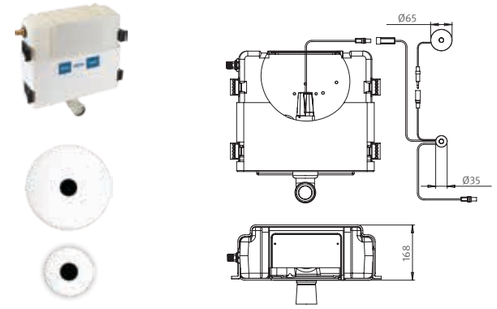
Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.



ELECTROMAGNETIC SF CISTERN

Single flush
Allows flushing of the toilet once the users place their hands within the sensor range. Available in a variety of special finishes.

- 620620 **ELECTROMAGNETIC SF CISTERN,**
  12V 2.5 Amp IP68 Transformer



ELECTROMAGNETIC DF CISTERN

Dual flush
Allows flushing of the toilet once the users place their hands within sensor range. Operating the small sensor will activate a half flush (3 liters) and operating the large sensor will activate a full flush (6 liters).

- 620630 **ELECTROMAGNETIC DF CISTERN,**

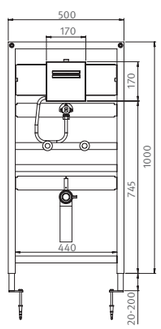
Delivered ready for installation with flush valve and complete required accessories included.

* Urinal bowl not included

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.



NARA 2030 K

- 800277 **NARA 2030 K,** 9V Battery

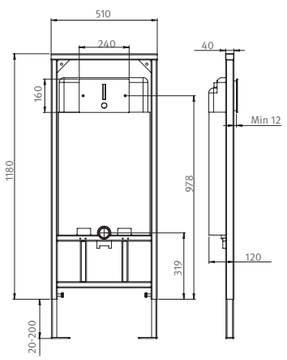
ARTIS H

Electronic touch-free concealed cistern system

Complete with an iron frame for wall hung toilet. Activated by a dual flush infrared sensor. Operated by an IP68 encapsulated switching adapter 12V transformer. Includes an override touch piezo switch, and an integral overflow pipe (warning pipe) to prevent flooding. Stainless steel AISI316 panel and 2 vandal resistant side screws, other finishes available. Pre-flush optional upon request. A 24 hour hygiene flush is included. The following settings can be changed by using the Stern remote control: Sensor Range, Security Time, Delay In, Delay Out and On-Off.

Hygiene Flush: To maximize hygiene, this product is equipped with a 24 hour duty flush. The flush takes place after 24 hours of non-use. Prevents the trap seal from drying out, possible freezing of pipes and potential bacteria in standing water. This function can be disabled using the remote control.



ARTIS H

Dual flush operation.
Includes an override touch piezo switch.

REMOTE CONTROLS

REMOTE CONTROL

Allows easy maintenance of extensive installations requiring custom settings. The remote control allows adjustment of sensor features for all Stern electronic products, while some functions require a compatible product model:

- Sensor range
- Entrance to the self adjustment mode
- Security time
- Short flow time
- Flow time
- Delay in
- Delay out
- 24 hour hygiene flush
- Lock out time
- Temporary off
- Reset

Code Number: 07100005

SOAP & WATER REMOTE CONTROL

In addition to the possibility to change settings at liquid or foam soap dispensers, this remote control allows to change settings at Stern matching touch free faucets. The following functions and settings can be changed:

- Sensor range
- Soap quantity in foam Soap Dispensers
- Entrance to the self-adjusting mode in wall mounted faucets
- Soap tank refill
- Temporary shut off
- Air quantity in foam soap dispensers
- Reset to factory settings
- Liquid Soap Quantity 1 - 4

Code Number: 07100014

LIQUID SOAP DISPENSERS REMOTE CONTROL

Adjustable settings:

- Soap dosage
- Temporary shutoff function
- Soap tank refill
- Reset to factory settings

Code Number: 07100008

FOAM SOAP DISPENSERS REMOTE CONTROL

Adjustable settings:

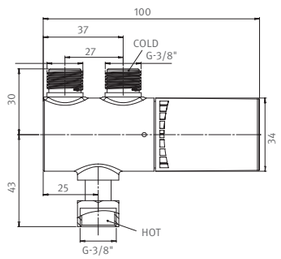
- Soap dosage
- Air quantity
- Temporary shutoff function
- Soap tank refill
- Reset to factory settings

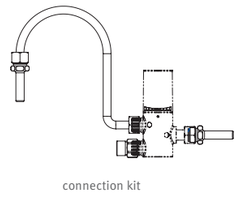
Code Number: 07100009

UNDERBASIN TMV
THERMOSTATIC MIXING VALVE

Advantages:

- Easy installation, connects directly to angle valves under the basin
- Thermostatic control for optimum temperature
- Can connect up to 4 faucets simultaneously
- Includes hot water stop function to prevent scalding
- Built-in filters to prevent dirt entering the system
- Back check valves prevent hot water entering cold water inlet



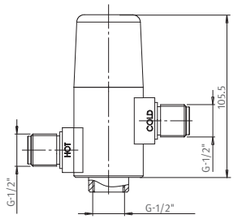


UNDERBASIN TMV

G 3/8" inlet

- 07200069 **UNDERBASIN TMV,** (without connection kit) 1 unit
- 07200069-US **UNDERBASIN TMV,** (with connection for US) 1 unit
- 07200075 **UNDERBASIN TMV,** (without connection kit) 12 units
- 07200073 **UNDERBASIN TMV,** (with connection for US) 12 units

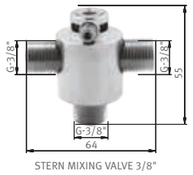
- 07291113 **UNDERBASIN TMV CONNECTION KIT,**
  Includes 1 x flexible hose 3/8", 1 x 90° brass arch, 1 x T-piece 3/8"



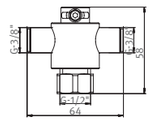
INTEGRATED THERMOSTATIC MIXING VALVE

G - 1/2" inlet

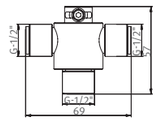
- Includes built in filters and check valves.
- Easy installation
- Thermostatic control for optimum temperature
- For 1 to 6 sanitary points of use(depending on flow rate) .
- 07010198 **INTEGRATED THERMOSTATIC MIXING VALVE**
- 07201001 **INTEGRATED THERMOSTATIC MIXING VALVE 6-PACK**



STERN MIXING VALVE 3/8"



STERN MIXING VALVE 3/8" WITH NUT



STERN MIXING VALVE 1/2"

STERN MIXING VALVE

Mechanical Mixing Valve Includes built in filters and check valves.

- Easy installation
- An easy-to-use adjustment allowing pre-mix of hot and cold water.
- Enables the technical staff to manually set the water temperature at .. any given time.
- 200060 **STERN MIXING VALVE 3/8",** G - 3/8" inlet
- 200065 **STERN MIXING VALVE 3/8" WITH NUT,** G - 3/8" inlet
- 200070 **STERN MIXING VALVE 1/2",** G - 1/2" inlet

COVER PLATE KIT

Offers a solution for deck mounted faucets to cover unused mounting holes. 28 mm / 4" deck plate kit.

- One hole cover plate, for single hole mount faucets.
- Covers 28 mm diamter / 4" mounting holes
- Complete kit with gasket and screw

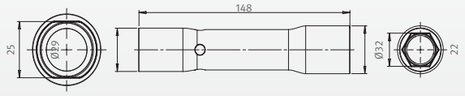
SOLENOID KEY

Specially designed customed key for easy maintenance of the Stern solenoid valves.

Code Number: 07590009



NEW!

PROPRIETARY SOAP ADAPTOR KITS

Now you can connect any container of soap that is compatible with Stern's soap dispenser using our Universal Proprietary Soap Adaptors.

Adaptors come in two sizes: 45 - 59 mm, and 30 - 38 mm to easily connect any soap container.

DRAWING	PRODUCT NAME	DESCRIPTION	PART NUMBER
	2L UNDERBASIN TANK CONVERSION KIT	Includes: 2L soap container, breathe pipe, rubber seals and mounting support. To be used with Stern soap dispenser models.	07247011
	SMALL PROPRIETARY SOAP ADAPTOR	Includes: small elastic cover adaptor for use with proprietary individual soap containers. Soap container opening outer min/max diameters including thread: 30mm-38mm	07270294
	SMALL PROPRIETARY SOAP ADAPTOR FOR MF	Includes: small elastic cover adaptor for use with proprietary soap containers. For multifeed up to 3 products. Soap container opening outer min/max diameters including thread: 30mm-38mm	07270295
	BIG PROPRIETARY SOAP ADAPTOR	Includes: big elastic cover adaptor for use with proprietary individual soap containers. Soap container opening outer min/max diameters including thread: 45mm-59mm	07270296
	BIG PROPRIETARY SOAP ADAPTOR FOR MF	Includes: big elastic cover adaptor for use with proprietary soap containers. For multifeed up to 3 products. Soap container opening outer min/max diameters including thread: 45mm-59mm	07270297

PLUG IN TRANSFORMERS FOR FAUCETS, URINALS, TOILETS AND SHOWERS

Transformers with 5 meter cable male/female waterproof connector (CE, RoHS, UL).

TECHNICAL CHARACTERISTICS	
INPUT VOLTAGE	100 - 240V
OUTPUT VOLTAGE	9V
FREQUENCY	50 - 60 HZ
OUTPUT CURRENT	500 MA

PICTURE	PRODUCT NAME	CONNECTOR	CODE NUMBER	12-PACK CODE
